## Profile

Young and talented software developer with a history of leading IT projects and engineering different types of web services.

I have been both employed and worked on my own IT projects. I also have experience of over 3 years of commercial development.

I am looking for a challenging position that will allow me to fulfill my potential and contribute to my future employer's success.

## Experience

I am positioning myself as a web developer, mainly frontend. Preferred programming languages are TypeScript & JavaScript (ES6 specification).

I have experience with a wide range of different frameworks. I am also keen about new technologies, but my main stack is Express JS for server-side development and React JS for SPA frontend.

## Employment history

**Full-stack developer at Metrica Agency**  
*May 2022 – Present. Moscow, Russia (remote)*

*Responsibilities:*

1. Development SPA & SSR applications.
2. Writing customized unit tests.
3. Code reviews.
