Profile

Young and talented software developer with a history of leading IT projects and engineering different types of web services.

I was both employed and worked on my own projects. I also have an experience of over 3 years of commercial development.

I am looking for a challenging position that will allow me to fulfil my potential and contribute to my future employer's success.

Experience

I am positioning myself as a web developer, mainly frontend. The main programming languages I use are TypeScript & JavaScript (ES6 specification). I have experience with a wide range of different frameworks. I am keen about new technologies, but my main stack is Express JS for server-side development and React JS for SPA frontend.

Employment history

➢ **Full-stack developer at Metrica Agency, Moscow, Russia**
May 2022 – Present

Responsibilities:
1. Development SPA & SSR applications
2. Writing customized unit tests
3. Code reviews

Technology stack:
- Typescript
- Node.js, Express.js, MongoDB
- React.js + Next.js, Mobx

➢ **Developer at Tokenizer, Moscow, Russia**
January 2022 – August 2022

Responsibilities:
1. Scaling desktop application for automated checkouts on ecommerce sites and NFT minting
2. Writing technical documentation

Technology stack:
- JavaScript and Python metaprogramming
- RPC interaction: Ethereum, Solana, Cardano

➢ **Team leader & developer at Quasar Alpha Group, Moscow, Russia**
September 2021 – May 2022

Responsibilities:
1. Maintaining and scaling the renewal subscription system (recurring payments in cryptocurrency)
2. Communication with customers and developing project roadmap according to their desires
3. Team management, tasks distribution
4. Code reviews
5. Writing web scrappers and CRMs
6. Writing discord bots

Technology stack:
- TypeScript
- Node.js, Express.js, Discord.js
- Python + Flask, Discord.py
- PostgreSQL
- RPC interaction: Solana, Ethereum, Tron, Binance Smart Chain

➢ **Co-founder, tech leader at Degosh, Moscow, Russia**
May 2021 – July 2022

Responsibilities:
1. Build backend and frontend architecture
2. Reverse engineering, work with captcha and access tokens, TLS servers
3. Writing checkout automation bots: supreme, adidas/yeezy, Binance NFT
4. Writing and scaling CRM for licenses keys, renewal dates and payments

Technology stack:
- JavaScript, Angular.js
- Node.js, Express.js, Discord.js
- MongoDB
- Webpack

➢ **Web developer at Legion-it, Moscow, Russia**
June 2019 – October 2020

Responsibilities:
1. Developing ecommerce web sites
2. Developing landing pages

Technology stack:
- Figma
- WordPress
- Ecwid
- HTML, CSS
- JavaScript, jQuery

Education

Charles university, FSc, Prague, Czech Republic
Drop-out due to the geopolitical situation in Russia, incomplete studying

School 508, Moscow, Russia
Graduated in May 2020
Program of in-depth study of physics and mathematics
